What our students say

'We have a lot of debates – the handouts mean we can just discuss the topics in depth'

'I think about the world completely differently now, questioning everything I see in the news.'

'It makes me a little angry at times, but I have a better understanding off the world'.

'There are a lot of theories to remember, but if you organise your handouts/notes, it becomes easy in Year 13'.

What is sociology?

- The study of how society is organised and how we experience life.
- It tries to explain how social structures, like education and the family, influence our behaviour.
- It also tries to explain how micro interactions we have shape larger structures/institutions.
